**If you need help** understanding these results you can contact our experts at consultant@decodeme.com. Based on the nature of your question we may refer you to a genetic counselor.

### Results currently based on:

The results in this report are based on calculated risk associated with males of European ancestry.

European ancestry

Male

**Your relative genetic risk** shows where you lie on this simple thermometer like scale. See if you lie below or above average(1.0) by looking at the arrow and the number.

**Your lifetime risk** is a way for you to compare your results to the population. The colored bar of the lifetime risk diagram shows your results and the lower bar shows the population average for your ethnicity and gender.

**Many traits and characteristics** are affected by genetic information. See what your DNA has to say about you and see if your genetic profile is an accurate reflection of yourself.

Condition	Your results	Description
ABO Blood Types	<p>you &gt; Blood group A (genotype AO)</p>	A, B, O and AB are the four major blood types. Your blood type depends on which kind of glycoprotein, or antigens, are found on...
Abdominal Aortic Aneurysm	<p>Average 17.0%</p>	When a weak area of the abdominal aorta expands or bulges, it is called an Abdominal Aortic Aneurysm (AAA).
Age Related Macular Degeneration	<p>Average 8.0%</p>	Age-related macular degeneration is a disease of the eye and a leading cause of vision impairment for people over 60 years of a...
Alcohol Flush Reaction	<p>you &gt; No alcohol flush reaction</p>	Some people experience an unpleasant reaction to drinking even a slight amount of alcohol. Their face turns red, and sometimes ...
Alzheimer's Disease	<p>Average 6.0%</p>	Alzheimers Disease (AD) is the most common form of dementia (brain disorder), accounting for about two-thirds of all dementia ...
Asthma	<p>Average 12.8%</p>	Asthma is characterized by inflammation of the airways that results in a narrowing of the air passages (called bronchi) in the ...
Atrial Fibrillation	<p>Average 25.0%</p>	Atrial fibrillation (AF) is the most common sustained heart rhythm abnormality in man.

**Note that these calculations may NOT include all risk factors.** These are the results of calculations comparing your genetic sequence to sequences of participants in studies published in the world literature on genetic risk for these diseases. If you are interested in how deCODEme calculates risks, go to deCODEme.com for more information. This test was developed and its performance characteristics determined by the deCODE genetics Diagnostic laboratory. It has not been cleared or approved by the U.S. Food and Drug Administration (FDA).
